**Subject: Williams Laurel Mountain Midstream Operating, LLC
Springhill Compressor Station (GP5-26-00587C)
Springhill Township, Fayette County, PA.**

Dear Mr. Sandy:

Per our discussion, please find enclosed three revised copies of Williams Laurel Mountain Midstream Operating, LLC's (LMM) application to use the General Permit 5 for the installation of a new dehydrator at its Springhill Compressor Station. This facility is located in Springhill Township, Fayette County, PA. The original application was submitted on May 6, 2015.

During your review, it was found that the catalyst information submitted was incorrect and did not match the information provided when the engines were permitted for use under GP5-26-00587C. By submitting full copies of the application, instead of just replacement pages, future confusion over which catalyst data is valid should be eliminated.

Thank you for your attention in the matter. If you have any further questions, please contact me at 412-787-4197 or joe.mccay@williams.com.

Sincerely,

Joseph McCay
Environmental Specialist
